Comments	We have the sling/rigging onsite at OWM. We would just need you to drop a hook that we could attach our rigging too for lifting the tanks. I will also attach a sling to the bottom of each tank to act as a drag line/tag line for controlling the lowering of the tanks and hopefully assist with reducing the spin during flight. Transport propane fuel to Old Woman Mountain using existing 250-gallon pony tanks to transfer fuel to a single 1000-gallon tank staged at the OWM facility. When complete we expect to have the 1000-gal tank 80% full and the two 250-gal pony/transfer tanks at 80% full.
