

Crew would like to add 1/22 as additional day and add additional work locations.

- Can the crew HEC with Air chair to 47/271 at 7.5 miles? This is usually acceptable – Added [@Perry, Jared](#) for visibility.
- Also, there is a home that is in dense trees but 220ft from the tower, please confirm if evac is mandatory due to no poles are being set.
- Please also confirm if HWY 58 needs traffic control, this road is very less traveled averaging 6 cars per day. There will be an HEC Pick site [@Angeloni, Ronald](#) please provide coordinates of where the crew will drive to and HEC from. I've indicated in the KMZ, please let me know that I need to change it.
