Subject: [EXTERNAL] RE: Construction Environmental Support Request: North Coast TD2510950
06/16/2026

Hi Steffan,

The added HLZ been documented; an amended ERD will not be issued at this time. Please see the environmental requirements in the table below.

TD Number	Structure Number	Trim Date	Dig Date	Work Date	Scope of Work	Approved Access	Environmental Requirements
TD2510950	1939668E	N/A	16-Jun	23-Jun	Pole replacement	Heli Access	Nesting Bird/Acorn Woodpecker Survey on 6/12 and between 6/18 & 6/19
TD2510950	Las Virgenes Rd HLZ (34.09239, -118.70416)	N/A	N/A	23-Jun	HLZ	Heli Access	Crew Check

Survey results will be reported in real time within 24 hours of the survey date. Please click the following link: [RokPower Hyperlink](#) to access survey results. Please check the spreadsheet to verify if additional surveys are warranted after the initial survey. Positive results will be communicated through the spreadsheet *and* email. Negative results will be communicated only through the spreadsheet. We will not send emails about negative results. Please contact us as soon as possible if any construction dates change, to ensure environmental compliance is maintained.

For poles listed as **crew check**, you are clear to proceed with the scheduled work as long as all environmental requirements in the ERD are adhered to, and you have crew checked the work area.

Crew check for nesting birds is required:

- **Impacting nesting birds is against state and federal law, and against SCE policy.**
- All construction and trim crews are required to check 200 feet around the work area upon arrival at the site, and before unloading any materials.
- Look for nesting bird behavior such as mobbing, chirping/ fussing, dive-bombing people or vehicles, or a vocal bird hanging around the area.
- Look in and around equipment, nearby trees or bushes, owl boxes on or near poles, areas where equipment will be staged, and any burrows nearby.

If you find a nest or nesting bird behavior, please stop work and report it to SCE Environmental Requirements at 833-723-2362.

Thank you,

Please contact your [T&D Specialist](#) with any questions, issues, or concerns.

Hello,

Stantec has received your request and will process it before your scheduled work dates. You will receive an email with any required surveys or monitoring when the request is complete. Surveys are typically scheduled within four days of the first construction and date.

Thank you,

Tiffany Byington
Project Coordinator
