

INYO NATIONAL FOREST/BLM BISHOP FIELD OFFICE SPECIAL USE AVIATION FORM

PURPOSE

This form is to be prepared for low-level aircraft flights related to a special use authorization or other use of National Forest System, and BLM Bishop Field Office lands, such as FERC licensed projects. Landing of aircraft on National Forest System, and BLM lands requires a separate authorization, and any proposed landing in the wilderness requires additional analysis to determine if landing is necessary. Information in this form is used to aid INF/BID Aviation and Dispatch personnel in their efforts to identify and mitigate potential airspace conflicts that may arise between known special use aviation activity and emerging INF/BID incident aviation activity. Please attach project maps if available.

USFS ROUTING

Your assigned Permit Administrator will provide this form to you. Once you email the form back to your assigned Permit Administrator, they will forward the verified information to the Inyo National Forest Acting Aviation Officer Matthew Quezada (matthew.quezada@usda.gov) and OVCC Dispatch (caovcc@firenet.gov).

BLM ROUTING

Your assigned Permit Administrator will provide this form to you. Once you email the form back to your assigned Permit Administrator, they will forward the verified information to the CND Unit Acting Aviation Manager David Brinsfield (dbrinsfi@blm.gov) and OVCC Dispatch (caovcc@firenet.gov).
